Exploring the Merits of Anthropology

EXTENSIVE GS OVERLAP

Significant synergy with multiple GS papers, especially GS I (Society), GS II (Governance), and GS III (Science & Tech, Environment), reducing overall prep load.

CONCISE & TIME-EFFICIENT

Anthropology is considered one of the shortest major optionals, allowing you to complete the syllabus quickly and focus more on revision and other papers.

HIGH SCORING POTENTIAL

Scoring 300+ marks is relatively more achievable compared to many other optionals, with proper strategy and answer writing.

DYNAMIC APPLICATION OF CONCEPTS

The only major optional with a 10%+ success rate (2013–2019) — a strong indicator of its reliability and consistency.

TOPPER'S CHOICE

Anthropology is the only optional to produce 2 AIR-1 rankers in the last 5 years, highlighting its potential to secure top ranks.

A PERFECT BRIDGE BETWEEN HUMANITIES & SCIENCE

With its unique blend of scientific concepts and socio-cultural analysis, Anthropology caters well to both science and humanities backgrounds.
